

Engineering Design

Monteath & Powys has a proven track record of experience and expertise in providing technical backup and resources to provide exacting civil design services for a variety of different projects especially land development projects that range in size from 1 to 1,000 lots.

The Director in charge of design services, Greg Burnitt, has over 25 years experience in managing the engineering design process.

With Greg's direction, we have forged strong relationships and partnerships with approval authorities, private companies and professional associations to maximise the effectiveness of our services.

He is supported by over 50 professional surveyors, planners, project managers and administrative staff to improve the effectiveness of our design services.

As well as providing project specific design services, we ensure that projects are completed in a timely way to minimise costs and comply with all the relevant standards.

Above all, we ensure your development has the right approvals for power, water, sewerage and communication services.
